Jan. 12, 1956

Dear Joshua,

Just a note to let you know that I have obtained some de-lysogenized cells. Unfortunately the one tested thus far has lost ~~its~~ all of its mutational capacities. Others are still in the works. One point of useful technical information. If cells grow poorly on EMB "O" supplementation with 0.1% glucose ~~and~~ is very helpful.

Sincerely

A handwritten signature in cursive script, appearing to read "Horton", with a long horizontal flourish extending to the right.
